## INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and \$250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, 6525 Belcrest Road, Hyattsville, Maryland 20782. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

## ITEM

- 5 Insert the date the applicant determined that he had a new variety based on the definition in Section 41 (a) of the Act and decision is made to increase the seed.
- 13a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.
- 13b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.
- 13c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.
- 13d Provide complete data indicative of novelty. Seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty may be submitted. Seeds submitted may be sterile.
- 13e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

Exhibit A

Origin and Breeding History of the Variety

1. "Crimson Jewel" originated as a selection from the variety Jewel Mixed taken in 1965.
2. Selections were made each year for five years and in 1970 pure lines were obtained and the increase to the stock seed stage commenced. The first commercial crop was planted in 1972.
3. Roguing consists of removing occasional plants where the flowers are of a paler color and also taking out any plants that revert back to the vine type of habit.
4. A further crop was planted in 1973 and this crop required very little roguing.

Exhibit B

Botanical Description of the Variety

"Crimson Jewel" is a dwarf type of Nasturtium with semi-double cerise flowers. One of the distinct features is that the flowers stand well above the foliage. Some of the older Nasturtium varieties tend to hide their flowers down in the foliage.

The plants grow to about 30 cm. in height and the foliage is darker green than in most varieties. The flowers are semi-double and are approximately 5-6 cm in diameter.

This variety flowers very freely in the cooler, coastal areas. In warmer climates the best show is produced early and late in the season when the temperatures are lower.
